

**WORKING TOGETHER TO
MANAGE RISKS AT WORK**

Risk management - Identify hazards

**Observe
the work**

**Look
for trends**

**Use surveys
and tools**

**Review available
information**

**Have a way for workers
to report hazards**

**Find out more about risk
management at
safeworkmonth.swa.gov.au**

WORKING TOGETHER TO
MANAGE RISKS AT WORK

Risk management - Common hazards

Psychosocial hazards

Working at heights

Working in heat

Slips, trips and falls

Dusts and gasses

Remote or isolated work

Chemicals

Noise

Fatigue

WORKING TOGETHER TO
MANAGE RISKS AT WORK

Risk management – Assess

Once hazards have been identified,
assess the risks they create.

How severe is
the risk?

Are your control
measures effective?

What action should you
take to control the risk?

How urgently do you
need to take action?

management at
safeworkmonth.swa.gov.au

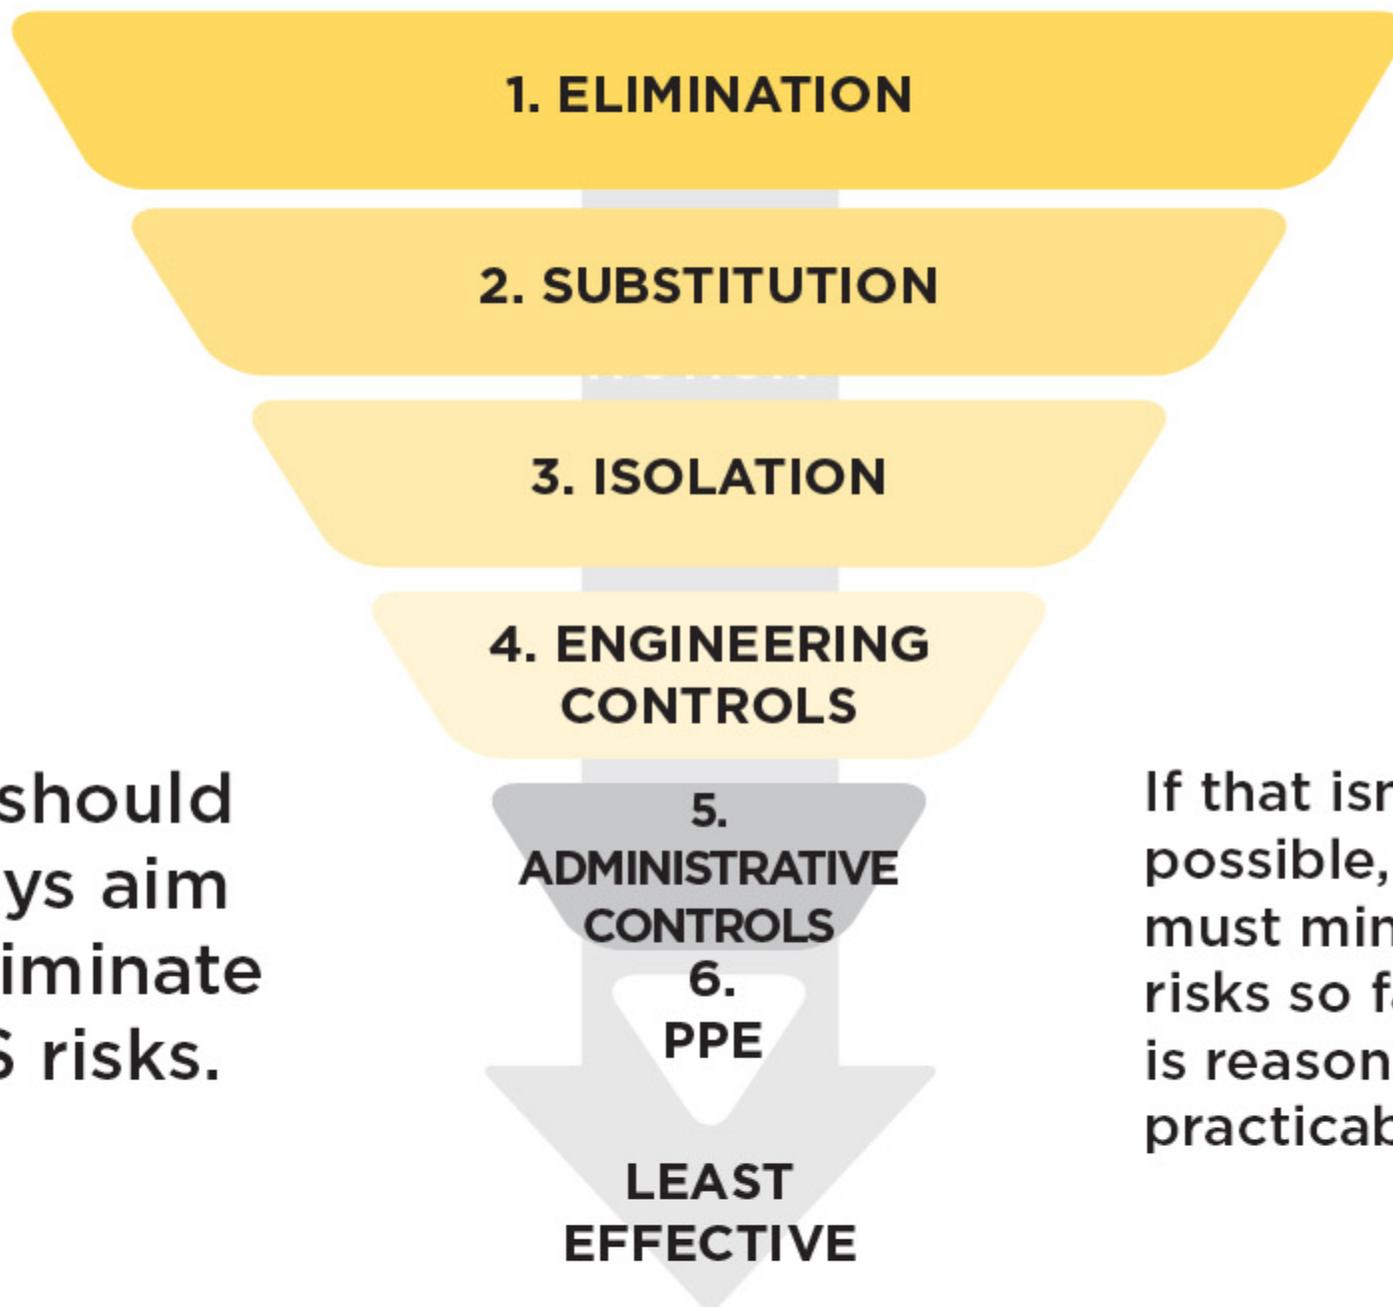

WORKING TOGETHER TO
MANAGE RISKS AT WORK

Risk management – Control

MOST EFFECTIVE

You should always aim to eliminate WHS risks.

If that isn't possible, you must minimise risks so far as is reasonably practicable.

**WORKING TOGETHER TO
MANAGE RISKS AT WORK**

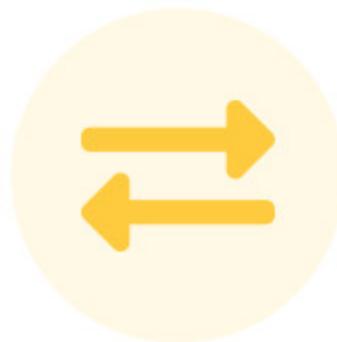

Risk management – Review

Review the control measures
to ensure they are working as planned.

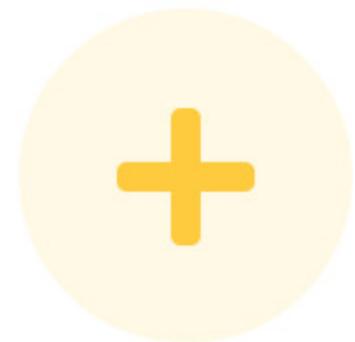

Don't wait for something to go wrong!

When it's
not working

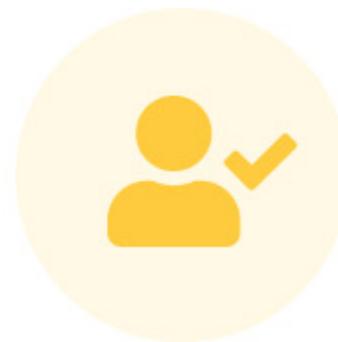

Before
a change

A new risk
is identified

Consultation indicates
a review is needed

HSRs request
a review
